

Ioffe Institute is one of Russia's largest institutions for research in physics and technology with a wide variety of operating projects.

Some facts:

- The scientific staff consists of 1100 employees which include 220 Doctors of Philosophy and 600 Candidates of Science
- 73 labs
- The network of 20 minor investment enterprises

Research area:

- High-temperature superconductivity
- Quantum-dot heterostructures and devices based on them
- Fullerenes and atomic clusters
- Photonic crystals
- High Effective and High Intensity LEDs

In the framework of collaboration with Finland Ioffe Institute would be interested in the following applications:

- Networking and exchange of experience
- Collaboration with Finnish universities, service providers and investors for joint development of projects
- Organization of educational and social events

The Centre of Technology Transfer under Ioffe Institute

Mission:

Development and information support of the projects engineered by Ioffe Institute' labs

Contacts:

Adress: 26 Polytekhnicheskaya, St
Petersburg 194021

Phone / Fax: +7 812 292 7399

E-mail: inno@mail.ioffe.ru

Services:

- Management and strategy consulting
- Market analysis
- Attraction of investments
- Evaluation of IP
- Organization of the events dedicated technology transfer
