ReactionGrid Inc.

ReactionGrid is a producer of fully customized 3D world projects and can provide both custom development expertise as well as the underlying platform technology. Our focus is on the educational and business use of 3D environments. We also have in-house expertise in game-based learning, instructional design, artistic design, 3D content development and project management.

Our in-house developed platform is Jibe, a multiuser 3d virtual world platform based on Unity3D.

A Jibe world can be embedded on any web page, including mobile devices (iOs and Android), and can integrate with a preexisting LMS/CMS as well as any industry standard database.

For more information or to arrange a demo, please contact:
